WaterDiss2.0 Consensus Conference: Expediting the Transfer of
European Water Research. Berlin, 3 – 4 November 2011

- Communication platform: The European Water Community
- Storage of information on FP analysed projects: WaterDiss2.0 E-Fair

European Water Community

General information & Objectives

Communication platform with the aim to connect science with policy to improve water management in Europe: Open to all those interested in the science policy interface

The platform takes the form of a community: exchange ideas and information regarding research projects, results and research needs between scientists, policy makers, water managers and other stakeholders.

Coordinated by Office International de l'Eau and supported through a number of projects and the consortia involved such as WaterDiss, WaterRtoM, IWRM-Net SCP.

European Water Community supports you

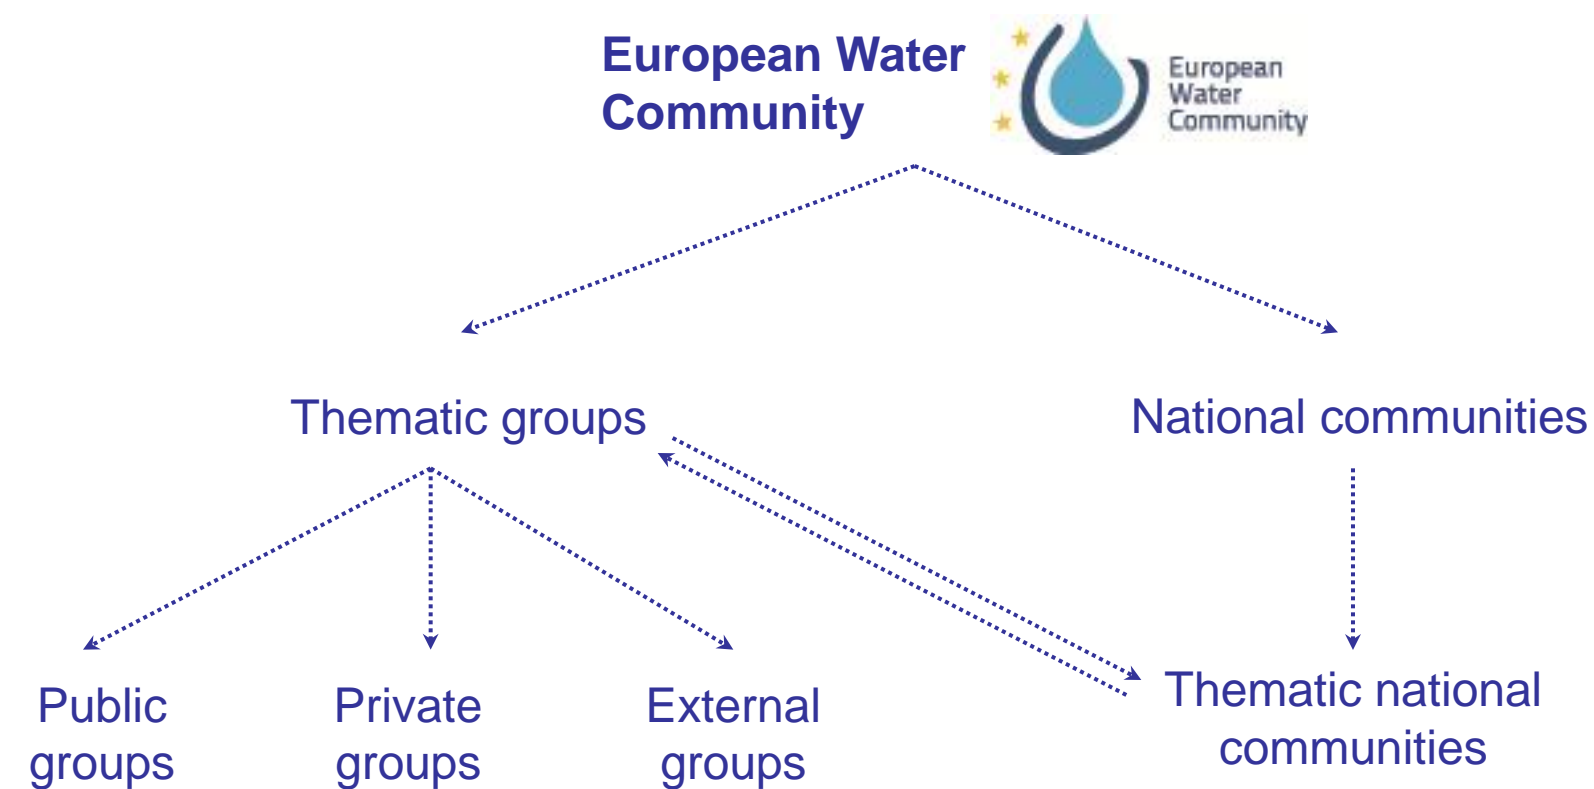

The first platform dedicated to the Science-Policy Interface

In this framework, the community

- supports you in creating your thematic networks
- Gives you access to all information posted by members

Valuable tool in the exchange of information and documents or when you are looking for partners.

European Water Community Simplified structure

To connect and join us:

www.europeanwatercommunity.eu

WaterDiss2.0 E-fair Main points

WaterDiss2.0 objective: **speed-up the transfer of research outputs to water stakeholders**

Selection of **60 FP research projects** on water and **analysis of their outputs**

E-fair **focused on the research outputs** and will **store all the information** collected and analyzed during the first phase of the project

WaterDiss2.0 E-fair What the tool provides you ?

Example of information stored:

- General information on each project
- Output description
- Innovative aspects and advantages
- Output state of development
- Collaboration expected

E-fair contribution

For researchers:

- Help for dissemination of projects results
- Receive proposals for new partnerships

For « research users »

- Improve access to water research outputs for easier ownership
- Create opportunities in the formation of new partnerships

E-fair access

Available from early 2012 on
