

WaterDiss2.0
Dissemination and uptake of FP water research results
Consensus Conference
Berlin, 4 November 2011

From research to innovative solutions,

**HOW WATERDISS 2.0 WILL
SUPPORT YOU?**

FP7 project – from 2011 to 2013

European research context

As stated by FUNDETEC (FP6-project) final report in December 2007, “the typical length of time needed to complete the development cycle (in the water sector) is 10 years”; this means that research commissioned today will impact water management practices within about 12 years, far after the next milestones of the Water Framework Directive (2015, 2021).

The general objective of WaterDiss2.0 is to speed-up the transfer of research outputs to water management institutions (a basin authority or a city) with a targeted time lag of only 3 - 5 years.

Research results and outcomes and then ? The step after by WaterDiss

- collect information on research results
- analyse their potential future,
- set up an individualised strategy for further dissemination and uptake
- organise events for brokerage
- support transfer to the targeted stakeholders

Tools developed for dissemination of FP projects results

- Project outputs **Standard Analysis Grid**
- Template for **Individual Dissemination Strategy**

*Developed by the consortium, field-tested with 10 projects, and to be discussed / improved during this **consensus conference** with projects coordinators and key stakeholders*

European Water Community

[Fonctionnement](#)

[Rejoindre la communauté](#)

Cette communauté est une plateforme de communication dont le but est d'améliorer la gestion de l'eau en Europe en promouvant les liens entre la recherche et les politiques publiques (Science - Policy Interface, SPI).

Elle est ouverte à l'ensemble des acteurs intéressés par cette thématique et désireux d'échanger des idées et de l'information sur les projets, résultats et besoins de recherche.

La Communauté de l'Eau est coordonnée par l'Office International de l'eau et promue par les projets WaterDiss, WaterRtoM et IWRM-Net SCP.

Events for dissemination of FP projects results

- Brokerage events (next events : Pollutec in Paris – December 2011, WWF6 in Marseille – March 2012)
- 1-day Training seminars : 7 in 2012 (FR, DE, PL, UK, ES, IT, RO)
- 2-hour webinars ; 7 in 2012 (FR, DE, PL, UK, ES, IT, RO)
- 2 summer schools (2012, 2013)
- Inputs in the Enterprise Europe Network (70 local consortiums, gathering about 600 partner organisations in more than 40 countries)

Conclusion

*From research to innovative solutions,
WaterDiss aims to feed the new European
policy on innovation, and the candidate
“**European Innovation Partnership on
Water Efficiency: Every drop counts**”*
